ASIC Adapter CustomSolution

Adapters allow the user to interconnect an available semiconductor package to an existing pre-designed footprint, providing a form, fit and function replacement which allows the user to continue using the existing PCB design without need for redesign and expensive re-qualification costs.

High reliability industry sectors, Civil Aerospace, Defence, Rail, Deep Sea, Automotive, Medical with both Custom and COTS parts.

Mainstream commercial users also benefit from these solutions as cost savings over last time buys and grey market supply issues.

- Adapters to Mitigate Component Obsolescence.
