ConTech, a Division of Calnex Mfg., announces the DRS series of chassis mount DC/DC converters. The DRS Series offers 60 Watts of output power in an encapsulated case, making it well suited for ruggedized backplane applications. The optional Din-Rail mount and easily accessible terminal blocks gives it the versatility to be used as a power solution in a large assortment of applications.

The DRS series offers output voltages from 5.1 VDC to 48VDC, with input ranges of 9-36 and 18-75 VDC, while achieving efficiencies up to 92%. The series has output over-voltage and short circuit protection. The units are encapsulated with a thermally conductive potting compound in a plastic resin and fiberglass case that meets UL94V-0. The enclosed case has external terminal blocks for ease of connection and is chassis mountable. Adding optional accessory DIN-03 base plate easily converts the chassis mount case to a standard Din-Rail mount. The DRS series is rated for 2500 VDC isolation, is UL approved, and is RoHS compliant.

For pricing or more information, contact Calnex Mfg. Co., Inc. at 800-542-3355 or fax 925-687-3333. Units are available from stock to 6 weeks. To view a complete data sheet of the DRS series go to <http://www.ConTech-us.com/pdf/drs.pdf> To see our complete product line visit our website at [www.ConTech-us.com](http://www.ConTech-us.com).
