

Hybrid/Electric Vehicle

On-board DC-DC Converters

- High Efficiency and Low Profile
- Up to 3.6kW Peak Power
- Compliance to Vehicle EMC Standard
- CAN2.0 Digital Communication
- IP67 Environmental Protection
- Module Solution for Fast Customization

Our Strength, Your Benefits

- Mature designs
- High density and low profile
- No electrolytic capacitor, long life cycle
- No discrete magnetic components, stable quality
- Industry pertinent test ensures safety

- Stick with global industry standards
- Design according to APQP process requirements
- Product design could meet ASIL B requirements
- EMC design could meet Level 3 requirements
- TS16949, ISO9001, ISO14001 certified facilities

- Advanced test device and equipment
- Strict sourcing, process and delivery control
- Product information traceable through the lifecycle
- Customized service
- Production with planned stock, fast response
- Around the clock after service

NetPower is a technology leader of power conversion solutions primarily focused on board mounted power (BMP) modules, including standard, modified, and custom DC to DC converters. NetPower's patented designs yield market leading conversion efficiency and superior thermal performance - enabling high density system designs.
